olution capable of fulfill specific needs, both with respect to strategic changes and in terms of improving performance and technological solutions. Issues Because of its very nature, the consumer goods sector is forced to handle a great quantity of Components : the price list contains numerous items. All product catalog updates , backups and print-outs entail a considerable use of resources, thus with the need to employ appropriate tools which enable to automate such operations and make them mo categories and sub-categories (similar to Windows resource management); this enormously facilitates consulting and updating the catalog. To accommodate the constant replacement of spare parts by manufacturers with newer versions, there is a function that associates to the replaced codes the information about the replacements , guiding the user to the correct order of the desired part. Moreover, thanks to the release of automatic update files , the spare parts catalog previously distributed on CD collectors' items. Miniatures, coins, pieces, toys, period cars, motorcycles.. al plant sector have to confront several problems: increased customer demands and expectations, emerging technologies and ever keener competition . Success depends on the ability to create value innovatively and to distribute the resulting benefits. Components Engine is able to provide the tools to develop innovative solutions, improving post-sale assistance efficiency. Issues The main problem in the plant construction industry is the customized construction of the machines produced. This leads n of catalogs created with Components Engine • Customers who consult the published catalogs can easily navigate among the parts and issue orders. • Components added to the cart can be printed, saved, sent via email or transmitted to the company's IT system. • Access to the consultation of the spare parts catalog can be profiled according to user type (customer, repair specialist, administrator, etc.). Every user has different privileges, e.g.: • Every customer may view only the drawings and docu stomer who purchased the products to visualize only his/her own work orders. Solutions and advantages Work order virtualization •
