Manufacturing of other products : Fields of employment details

the diversification of the delivered machines is the need to limit the customer who purchased the products to visualize only his/her own work orders. Solutions and advantages Work order virtualization • Components Engine enables to clone previously created spare parts catalogs , with the option of changing only the parts that actually differ from the original drawing. In general, most work orders comprise the same drawings, with the exception of a few tables (e.g. different machines with 70 tot Fields of employment details Fields of application Home Go ! Language Français English Italiano Português Español Deutsch Search home products support purchase contacts login Manufacturing of other products Spare parts for other types of machinery Field Today, leaders in the industrial plant sector have to confront several problems: increased customer demands and expectations, emerging technologies and ever keener competition . Success depends on the ability to create value innovatively and ed ones, adding and modifying only the tables that contain differences (the only ones that have an actual weight in terms of occupied disc space). Consultation of catalogq created with Components Engine • Customers who consult the published catalogs can easily navigate

among the parts and issue orders. • Components added to the cart can be printed, saved, sent via email or transmitted to the company's IT system. • Access to the consultation of the spare parts catalog can be profiled according to elop innovative solutions, improving post-sale assistance efficiency. Issues The main problem in the plant construction industry is the customized construction of the machines produced. This leads to have many plants, each different from the others, with the consequence of having a different spare parts catalog for every machine. The other issue stemming from the diversification of the delivered machines is the need to limit the customer who purchased the products to visualize only his/her own w al plant sector have to confront several problems: increased customer demands and expectations, emerging technologies and ever keener competition . Success depends on the ability to create value innovatively and to distribute the resulting benefits. Components Engine is able to provide the tools to develop innovative solutions, improving post-sale assistance efficiency.
