Components Engine CE²

re parts Catalogues and the consultation on the web Introduction CE² works on the same platform as the normal Components Engine licences. CE² uses all of the technological functions that are found within the Components Engine products, including the Importation of vector /pdf/raster drawings, the automatic recognition of hotspots, OCR algorithms, in-depth editing functions and lots more. It also has additional functions that allow for the operations carried out by Components Engine to be configured in a completely personalised manner. CE² is so flexible that it can be interfaced with any type of application in any environment. CE² allows for Components Engine technology to be integrated into previously existing applications or Services. Description CE² Basic Version The links between hotspots and applications will be entered in a data-Import table. Clicking on a hotspot (the interactive area) you will be addressed to the codes contained into the relationship table. An inte Components Engine CE² Products Go !
