Spares on CD

parts catalogs on CD-ROM, DVD or file ; consulting catalogs generated with this method is known as "off-line consultation". The off-line consultation of catalogs created with Components Engine is accomplished through the Components Engine Viewer *, a free software that enables the viewing, printing of spares catalogs and placing orders. The Viewer's task is to open the .CEF (Components Engine File) catalog files and to enable to consult, search for, and order spare parts. The Viewer has functions

Scooter, moto, motocicli, ciclomotori, motocarri, custom, side car, motocross, trial, speedway, sidecar. Field The automotive industry is entering its second century and it is characterized by the presence of a few large companies. Toda e producers, suppliers and retailers. Issues For a long time, the automotive industry has been forced to handle a huge quantity of components , ranging from interior accessories to body parts. In order not to get lost among incomprehensible piles of drawings, it is necessary to classify all spare parts in categories , identified by areas or use. Another frequent problem is the constant launch of new models and versions of vehicles and accessories , with the consequent classification of the spare

Manufacturing of other products : Fields of employment details

ntages Work order virtualization • Components Engine enables to clone previously created spare parts catalogs , with the option of changing only the parts that actually differ from the original drawing. In general, most work orders comprise the same drawings, with the exception of a few tables (e.g. different machines with 70 total drawings, differentiated from each other by 5 drawings); to increase the effectiveness of this redundancy, Components Engine exploits the virtual management of drawin
